- Deployment and Hosting: Heroku, Netlify, AWS

PROJECT EXPERIENCE

TMDB (The Movie Database) Website - Link
Web Developer   **02/2023 – 03/2023**

Project Description
TMDB is a popular movie website that provides information about movies, TV shows, and celebrities.

- Designed and implemented front-end interface using React.js, HTML, CSS, and JavaScript.
- Developed the back-end functionality using Node.js and Express.js, including user authentication, search functionality, and API integration.
- Integrated TMDB API to retrieve and display movie data, such as movie details, ratings, reviews, and cast information.
- Utilized MongoDB database to store movie data and information at the backend.
- Implemented a recommendation engine that suggests similar movies based on user preferences and viewing history.
- Collaborated with a team of developers, designers, and testers to ensure the successful completion of the project.
- Ensured responsiveness and optimized performance across different devices and browsers.
- Successfully deployed the TMDB website to a live server, making it accessible to users.
